Manf 353: Accounting & Financial Mgmt for Manf

SCHOOL OF ENGINEERING

This course explores accounting and financial management concepts important to a manufacturing setting. The course is designed to help students become more sophisticated users of strategic cost/managerial and financial accounting information for decision making. The course demonstrates how accounting information adds value to manufacturing organizations by providing recommendations to improve profitability of products, services, and customers. The course also focuses on measuring causes or drivers of costs, and making managerial recommendations about design, capacity, quality, and processes.
