ES 344: Aging in the 21st Century

HEALTH, EXERCISE SCI & RECREATION MGMT

This course is designed to serve as an introduction for undergraduate students to the physiological, neurobehavioral, and neuromotor changes associated with aging. Students will also discuss perspectives on 'healthy aging', what a person can expect during this process, and the utility of various lifestyles choices, particularly regarding healthy activity and exercise, on the aging process. Students will learn to better interpret and read current aging and medical research publications and trends. Issues such as Medicare, and ageism will also be discussed as will new concepts in wellness.
