ES 632: Advanced Structural Kinesiology
Health, Exercise Sci & Recreation Mgmt
 Clinically oriented advanced applied anatomy. Advanced analysis of human functional anatomy, primary emphasis on articular, skeletal, muscular, and nervous systems; specifically related to exercise science and prescription. Integrated discussions of physiological and biomechanical aspects of human movement for disciplines ranging from physical therapy and rehabilitation to biomechanics.

3 Credits

Prerequisites
• Bisc 206: Human Anatomy and Physiology I

Instruction Type(s)
• Lecture: Lecture for ES 632

Subject Areas
• Kinesiology and Exercise Science

Related Areas
• Health and Physical Education, General
• Health and Physical Education/Fitness, Other
• Socio-Psychological Sports Studies
