Ch E 543: Introduction to Polymer Science

CHEMICAL ENGINEERING

This course is designed as an upper-level undergraduate and introductory graduate-level elective to teach the fundamentals in polymer chemistry and physics, structure/property relationships, and characterization. The course is taught at an introductory level aimed at students with a background in chemistry (especially organic chemistry).

3 Credits

Prerequisites

- Chem 221: Elementary Organic Chemistry I
- Instructor approval or graduate standing.

Instruction Type(s)

- Lecture: Lecture for Ch E 543

Subject Areas

- Chemical Engineering

Related Areas

- Chemical and Biomolecular Engineering
