Ch E 543: Introduction to Polymer Science

This course is designed as an upper-level undergraduate and introductory graduate-level elective to teach the fundamentals in polymer chemistry and physics, structure/property relationships, and characterization. The course is taught at an introductory level aimed at students with a background in chemistry (especially organic chemistry).

3 Credits

**Prerequisites**
- Chem 221: Elementary Organic Chemistry I
- Instructor approval or graduate standing.

**Instruction Type(s)**
- Lecture: Lecture for Ch E 543

**Subject Areas**
- Chemical Engineering

**Related Areas**
- Chemical and Biomolecular Engineering
