C E 315: Civil Engineering Materials

Civil Engineering

Fundamental concepts of materials science including the structure and properties of materials and their relationship to material selection and system design; classification of materials; properties and behavior of construction materials including soils and aggregates, cement, concrete, metals, wood, asphalt, composites, and other new materials; mix design procedures and properties of Portland cement concrete and bituminous/asphalt mixtures; quality control and quality assurance.

3 Credits

Prerequisites
- C E 315 Requires: One Way-Co-Requisite C E 431

One-way corequisites
- C E 431: Soil Mechanics I

Instruction Type(s)
- Lecture/Lab: Lecture/Lab for C E 315

Course Fee(s)
Civil Engineering 2
- $100.00

Subject Areas
- Civil Engineering, General
- Materials Engineering

Related Areas
- Geotechnical and Geoenvironmental Engineering
- Structural Engineering
- Transportation and Highway Engineering
- Water Resources Engineering
