C E 421: Matrix Analysis of Structures

CIVIL ENGINEERING

Virtual work and virtual displacement methods; introduction to the flexability and displacement matrix methods; stiffness matrices for rod, frame, and slab elements; introduction to structural dynamics and elastic stability; computational tools.

3 Credits

Prerequisites
- C E 311: Structural Analysis

Cross-listed Courses
- M E 421: Structural Analysis

Instruction Type(s)
- Lecture: Lecture for C E 421

Subject Areas
- Civil Engineering, General
- Structural Engineering

Related Areas
- Civil Engineering, General
- Geotechnical and Geoenvironmental Engineering
- Structural Engineering
- Transportation and Highway Engineering
- Water Resources Engineering
