Csci 259: Programming in C++

Computer & Information Science

Study of programming in the language C++, covering character processing; use of pointers with strings, arrays and functions; data structures; bitwise operators.

3 Credits

Prerequisites
- Csci 111 or Csci 251

Instruction Type(s)
- Lecture: Lecture for Csci 259
- Lecture: Hybrid Lecture for Csci 259

Subject Areas
- Computer Science
