Csci 333: Digital Design and 3-D Printing

Computer & Information Science

This course introduces the principles and methods for computer-aided design of objects that can be rendered effectively on 3-D printers. It surveys the design techniques and the hardware and software technologies in 3-D printing workflows. Students create designs and render them on 3-D printers.

3 Credits

Prerequisites

- Csci 203 or Csci 211 or Csci 251

Instruction Type(s)

- Lecture: Lecture for Csci 333

Course Fee(s)

Computer Science

- $50.00

Subject Areas

- Computer Science
