Csci 387: Software Design and Development

**COMPUTER & INFORMATION SCIENCE**

Study of techniques for the construction of large, complex software systems, including project management, requirements analysis, specification, design, development, testing, documentation, deployment, and maintenance. Students develop software systems in a group structure that simulates an industrial setting.

3 Credits

**Prerequisites**
- Csci 211: Computer Science III (Minimum grade: C-)
- Csci 223: Computer Org. & Assembly Language (Minimum grade: C-)

**Instruction Type(s)**
- Lecture: Lecture for Csci 387

**Subject Areas**
- Computer Science
