Csci 521: Computer Systems Engineering

Analysis of computer system components and manufacturing economics, and how they influence design goals, direct architectural development, create hardware/software issues and modify implementation concepts, as well as system and circuit packaging.

3 Credits

Prerequisites

• Pre-requisite: CSCI 423 or CSCI 501 or Graduate Standing

Instruction Type(s)

• Lecture: Lecture for Csci 521

Subject Areas

• Computer Science
