El E 447: Modulation, Noise, and Communications

Spectral analysis, sampling theory, analog and digital modulation techniques, information, communication systems, and noise.

3 Credits

Prerequisites
- El E 352: Electronics Circuits II
- El E 331: Linear Systems

Instruction Type(s)
- Lecture: Lecture for El E 447

Subject Areas
- Electrical and Electronics Engineering
- Telecommunications Engineering

Related Areas
- Electrical and Electronics Engineering
- Laser and Optical Engineering
- Telecommunications Engineering
