Engr 662: Advanced Artificial Intelligence

School of Engineering

Advanced aspects of artificial intelligence. Logical foundations of AI. Machine learning, planning, representation of common-sense knowledge, image understanding. Intensive study of artificial intelligence programming techniques and languages.

3 Credits

Prerequisites

- Csci 531: Artificial Intelligence

Instruction Type(s)

- Lecture: Lecture for Engr 662

Subject Areas

- Computer Science
- Artificial Intelligence

Related Areas

- Computer and Information Sciences, General
- Information Technology
