Engr 662: Advanced Artificial Intelligence

SCHOOL OF ENGINEERING

Advanced aspects of artificial intelligence. Logical foundations of AI. Machine learning, planning, representation of common-sense knowledge, image understanding. Intensive study of artificial intelligence programming techniques and languages.

3 Credits

Prerequisites
- Csci 531: Artificial Intelligence

Instruction Type(s)
- Lecture: Lecture for Engr 662

Subject Areas
- Computer Science
- Artificial Intelligence

Related Areas
- Computer and Information Sciences, General
- Information Technology
