M E 427: Kinematic Analysis and Synthesis

Mechanical Engineering

Lectures introduce the kinematic design of mechanisms such as linkages, cams, gears and gear trains; motion of such mechanisms, their velocities and accelerations are analyzed by graphical, analytical, and computer-aided design methods of synthesis and optimization. Lecture and projects.

4 Credits

Prerequisites
- M E 324: Introduction to Mechanical Design
- Pre-Requisite: 24 Earned Hours

One-way corequisites
- Engr 330: Engineering Systems Analysis and Design

Instruction Type(s)
- Lecture: Lecture for M E 427

Subject Areas
- Mechanical Engineering
