**Emphasis - Medicinal Chemistry**
- M.S. in Pharmaceutical Science
- Emphasis - Medicinal Chemistry

**M.S. in Pharmaceutical Science**

**Description**
The M.S. in pharmaceutical sciences can be completed with an emphasis in environmental toxicology, medicinal chemistry, pharmaceutics, pharmacology, pharmacognosy, or pharmacy administration.

**Minimum Total Credit Hours: 31**

**Course Requirements**
Requirements for each emphasis area are given in the respective program description sections. Each emphasis area requires students to complete a minimum of 24 semester hours of course work and 6 hours of thesis.

**Emphasis - Medicinal Chemistry**

**Description**
A M.S. in pharmaceutical sciences with emphasis in medicinal chemistry prepares a graduate to do research toward understanding the mechanism of action of drugs. In such research, a medicinal chemist strives to establish correlations between biological properties and physiochemical parameters of drugs.

**Course Requirements**
Requirements for the M.S. with an emphasis in medicinal chemistry are to complete at least 30 hours, to include the following: 1. Students entering the program with no background in medicinal chemistry will take Advanced Medicinal Chemistry I, II (Medc 501, 502) (6 hours); 2. Medicinal Chemistry Research Methodology (Medc 503) (3 hours); 3. Seminar on Current Medicinal Chemistry Topics (1 hour). Two departmental seminars are required of master's degree candidates. Students are required to attend seminars each semester irrespective of whether they present a seminar that semester or whether they are enrolled in seminar. Students are encouraged to take at least one drug action and design course.

**Other Academic Requirements**
A thesis is required.
