

## Engr 612: Aeroelasticity

### SCHOOL OF ENGINEERING

Study of structural deformations due to time-dependent fluid flow phenomena over surfaces; effects of gusts and turbulence; structural design criteria.

3 Credits

#### Prerequisites

- [Engr 558: Vibration Analysis](#)

#### Instruction Type(s)

- Lecture: Lecture for Engr 612

#### Subject Areas

- [Engineering, General](#)
- [Physics, General](#)
- [Mechanical Engineering](#)
