

## **M E 421: Structural Analysis**

### **MECHANICAL ENGINEERING**

Classification and analysis of simple structural systems; ASCE-7 provisions for minimum loads; virtual work and virtual displacement methods; introduction to flexibility and displacement matrix methods; stiffness matrices for rod, frame, and slab elements; computational tools.

3 Credits

#### **Prerequisites**

- [Engr 312: Mechanics of Materials](#)
- Pre-Requisite: 24 Earned Hours

#### **Cross-listed Courses**

- [C E 411: Structural Analysis](#)

#### **Subject Areas**

- [Mechanical Engineering](#)
- [Civil Engineering, General](#)
