

NHM 676: Adv. Hospitality Information Technology

FAMILY & CONSUMER SCIENCES

Information and communication technologies (ICT) have emerged as key platforms to facilitate operations, commerce, and communication on a global basis. In the hospitality and tourism industry, the importance of information technology systems has increased tremendously in the past few years – and this trend will certainly continue. The integration of technology systems into the operation, marketing, and management efforts of hospitality and tourism organizations is an important key to success. This integration requires that technology and the overall organizational mission/goals are coordinated to achieve the desired effectiveness. This course is a survey of technology applications, issues, innovations, and trends in the hospitality industry. Emphasis is placed on the role of technology in operations and management of technology as a strategy. The content of this seminar-style course will be facilitated through readings, discussions, field trips, and research projects.
