

SRA 628: Qualitative Inquiry

HEALTH, EXERCISE SCI & RECREATION MGMT

Through presentation of scholarly readings and immersion into one's own in-depth research project, this course explores a variety of qualitative research approaches, taking into account issues of epistemology (ways of knowing), methodology (ways of examining), and representation (ways of writing and reporting). In so doing, it is designed to help both master's and Ph.D. students to develop an understanding of qualitative research methods and designs in sport and recreation as well as many related fields. The focus of the course is on the identification and creation of research problems, the development of designs, actual data collection, and analysis procedures to address those problems.

3 Credits

Instruction Type(s)

- Lecture: Lecture for SRA 628

Subject Areas

- [Parks, Recreation and Leisure Facilities Management](#)
