

G E 401: Geological Eng. Design Field Camp 2 GEOLOGY & GEOLOGICAL ENGINEERING

Advanced application of geological engineering field instruments and field techniques; geologic engineering mapping exercises as individual and group projects drawn from selected geological engineering topics, including hydrology, environmental applications, geotechnical engineering, hazards engineering, and resource assessment; preparation of geologic and engineering reports, maps, and figures; analysis of observed conditions to make engineering judgments.

3 Credits

Prerequisites

- Geol 303: Structural and Tectonic Geology
- Geol 305: Geomorphology
- G E 301: Geological Eng. Design Field Camp 1
- Engr 340: Engineering Geology
- Pre-Requisite: 24 Earned Hours

Instruction Type(s)

• Lecture: Lecture for G E 401 • Lecture: Lecture for G E 401

Subject Areas

• Geological/Geophysical Engineering
