

Math 269: Introduction to Linear Programming MATHEMATICS

Selected topics in quantitative methods with an emphasis on business applications. Topics include Gauss-Jordan elimination, simplex solutions for linear programming models and transportation and assignment algorithms.

3 Credits

Prerequisites

- Math 267: Calculus for Business, Econ., & Accy. I (Minimum grade: C)
- Successful completion of DS 099, if required.
- Accountancy Majors Only

Instruction Type(s)

• Lecture: Lecture for Math 269

Subject Areas

• Mathematics, General

Related Areas

- Algebra and Number Theory
- Analysis and Functional Analysis
- Geometry/Geometric Analysis
- Topology and Foundations
