

# Engr 678: Elasticstability SCHOOL OF ENGINEERING

Concepts of stability of equilibrium; buckling of beams, plates and shells under various loadings; approximations of eigenvalues; flutter of elastic systems, wings, panels, and hydrofoils.

#### 3 Credits

### **Prerequisites**

• Engr 671: Elasticity

## Instruction Type(s)

• Lecture: Lecture for Engr 678

#### **Subject Areas**

- Engineering, General
- Engineering Mechanics
- Civil Engineering, General
