

C E 472: Water Resources Engineering CIVIL ENGINEERING

Water supply systems, open channel hydraulics, hydrologic cycle, surface water hydrology, run-off models, groundwater flow and contamination. 3 Credits

Prerequisites

• Pre-Requisite: 24 Earned Hours

One-way corequisites

• Engr 323: Fluid Mechanics

Instruction Type(s)

• Lecture: Lecture for CE 472

Subject Areas

- Civil Engineering, General
- Water Resources Engineering

Related Areas

- Civil Engineering, Other
- Geotechnical and Geoenvironmental Engineering
- Structural Engineering
- Transportation and Highway Engineering
