

Minor - Electrical Engineering

- [Minor - Electrical Engineering](#)

Minor - Electrical Engineering Description

The Department of Electrical Engineering offers a minor in electrical engineering.

Course Requirements

The minor in electrical engineering requires a minimum of 18 hours of course work. Included in the 18 hours are the following required courses, totaling 14 hours: El E 235, 236, 331, 351, Engr 360, 361. Two El E elective courses, 300 or 400 level, totaling 4 hours or more complete the requirement for the minor.

Other Academic Requirements

Example: A) ISS 125 is open to all students. B) Students who have completed or are taking ISS 125 may apply for the minor. The application process will consider a student's GPA, motivation, choice of major, writing skills and maturity. Not all who apply will likely be accepted.
