

Geol 614: Advanced Geographic Information Systems GEOLOGY & GEOLOGICAL ENGINEERING

GIS&T project design and application; advanced analytical modeling using vector and rester-based data sets. Use of multivariate data and spatial process models. Use of spatial databases will be emphasized.

Prerequisites

• G E 511: Spatial Analysis

Cross-listed Courses

• Engr 614: Geometrics

Instruction Type(s)

• Lecture: Lecture for Geol 614

Subject Areas

• Geographic Information Science and Cartography

Related Areas

Geography
