

Astr 204: Astronomy of Stars and Galaxies

The lecture component of this course starts with a short introduction to general astronomy and the sky, and covers the Sun, classification, formation, and evolution of stars, galaxies, and cosmology. The lab component of the course consists of telescopic and visual observations, astrophotography projects, and computer lab activities on stellar and galactic astronomy. This course assumes mathematical knowledge at the Math 261 level. A student may not receive credit for both Astr 101 and Astr 204, nor credit for Astr 104 and Astr 204. A student may not receive credit for both Astr 103 and Astr 204 if taken simultaneously.

3 Credits

Instruction Type(s)

• Lecture/Lab: Lecture/Lab for Astr 204

Subject Areas

• <u>Astronomy</u>

Related Areas

• <u>Astrophysics</u>

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
