

Phad 696: Pharmacoepidemiology

PHARMACY ADMINISTRATION

This graduate-level course is designed to familiarize students in pharmacy or other health care fields with the principles of pharmacoepidemiology. To this end, the course would provide a comprehensive review of research study designs used in the science of pharmacoepidemiology. It would also involve a discussion of primary literature that details case examples of drugs withdrawn from the United States (US) drug market due to adverse events.

3 Credits

Prerequisites

- Instructor Approval Required
