

Csci 387: Software Design and Development

COMPUTER & INFORMATION SCIENCE

Study of techniques for the construction of large, complex software systems, including project management, requirements analysis, specification, design, development, testing, documentation, deployment, and maintenance. Students develop software systems in a group structure that simulates an industrial setting.

3 Credits

Prerequisites

- [Csci 211: Computer Science III](#) (Minimum grade: C-)
- [Csci 223: Computer Org. & Assembly Language](#) (Minimum grade: C-)

Instruction Type(s)

- Lecture: Lecture for Csci 387

Subject Areas

- [Computer Science](#)
