

## Ch E 543: Introduction to Polymer Science

### CHEMICAL ENGINEERING

This course is designed as an upper-level undergraduate and introductory graduate-level elective to teach the fundamentals in polymer chemistry and physics, structure/property relationships, and characterization. The course is taught at an introductory level aimed at students with a background in chemistry (especially organic chemistry).

3 Credits

### Prerequisites

- [Chem 221: Elementary Organic Chemistry I](#)
- Instructor approval or graduate standing.
- Prerequisite: Junior standing (60 hr).

### Instruction Type(s)

- Lecture: Lecture for Ch E 543

### Subject Areas

- [Chemical Engineering](#)

### Related Areas

- [Chemical and Biomolecular Engineering](#)
