Csci 353: Introduction to Numerical Methods

COMPUTER & INFORMATION SCIENCE

Numerical solution of problems; problem analysis, algorithm design, coding, testing, interpretation of results; use of software packages on mainframe computers.

3 Credits

Prerequisites

- Math 263: Unified Calculus & Analytic Geometry III
- Pre-Requisite: 24 Earned Hours
- Csci 111 or Csci 251

Instruction Type(s)

- Lecture: Lecture for Csci 353

Subject Areas

- Computer Science
