

Chem 673: Biochemistry II CHEMISTRY & BIOCHEMISTRY

Intermediary metabolism, including catabolic and anabolic processes involving carbohydrates, lipids, proteins, and nucleic acids. An independent study project is required.

3 Credits

Prerequisites

• Chem 671: Biochemistry I (Minimum grade: C)

Instruction Type(s)

• Lecture: Lecture for Chem 673

Subject Areas

- Molecular Biochemistry
- Biochemistry

Related Areas

- · Biochemistry and Molecular Biology
- Biophysics
- Molecular Biology
- Molecular Biophysics
- · Radiation Biology/ Radiobiology
- Structural Biology
