

# Ch E 251: Programming for Chemical Engineering CHEMICAL ENGINEERING

Algorithm development and structured programming techniques, including numerical and graphical applications related to engineering and scientific problem solving.

3 Credits

### **Prerequisites**

• Ch E 251 Requires: One Way-Co-Requisite Math 261

## **One-way corequisites**

• Math 261: Unified Calculus & Analytic Geometry I

## **Instruction Type(s)**

• Lecture: Lecture for Ch E 251

#### **Subject Areas**

• Chemical Engineering

#### **Related Areas**

• Chemical and Biomolecular Engineering
