

## **Engr 674: Fracture Mechanics**

### **SCHOOL OF ENGINEERING**

Stress fields near crack tips; modes of fracture; stress intensity factors; numerical methods. Critical stress intensity; fracture toughness. Energy considerations; the J-Integral. Crack-tip plasticity; small-scale yielding; crack-opening displacement. Fatigue; cyclic deformation; fatigue crack initiation.  
3 Credits

#### **Prerequisites**

- [Engr 617: Continuum Mechanics](#) (Minimum grade: C)

#### **Instruction Type(s)**

- Lecture: Lecture for Engr 674

#### **Subject Areas**

- [Engineering, General](#)
- [Mechanical Engineering](#)
- [Civil Engineering, General](#)
