

M E 422: Structural Design I MECHANICAL ENGINEERING

Design of steel and concrete structural members according to ACI and AISC LRFD specifications; reinforced concrete and rolled steel sections subject to axial force, flexure, shear, torsion, and combined loading; fatigue and fracture; introduction to connections.

3 Credits

Prerequisites

• Pre-Requisite: 24 Earned Hours

One-way corequisites

• M E 421: Structural Analysis

Cross-listed Courses

• C E 412: Design of Concrete Structures

Subject Areas

- Mechanical Engineering
- Civil Engineering, General
