

B.B.A. in General Business Description

The general business major will be a more broad-based program than our specialized majors (e.g., marketing or finance) to educate students and provide a solid understanding of business fundamentals. The scope of the major encompasses all facets of business and provides students with a wider scope of analysis across the business functional areas. Graduates are expected to work in business environments that require more diverse skills across the many areas of business. Graduates are expected to be general managers in medium and large businesses, and start or work in small or family-owned businesses in the state, region, and world. The major encourages students to pursue experiences, either internationally or in a work setting, and requires a minor from one of the other schools or colleges at the University of Mississippi to promote well-rounded and developed students for the demands of a diverse work environment.

Minimum Total Credit Hours: 120 General Education Requirements

The general education requirements for the B.B.A. in General Business include Writ 100 or Writ 101 and Writ 102 or Liba 102 (6); humanities (history, philosophy, or modern foreign languages) (6); Math 121/123 or 261/262 or 267/268 or 271/272 (6); lab science (astronomy, biology, chemistry, geology, or physics) (6-8); behavioral or social science (anthropology, political science, psychology, or sociology) (6); fine arts (art history, art, music, or theatre arts) (3); and literature (200 level) or foreign language (6).
