

Ch E 251: Programming for Chemical Engineering CHEMICAL ENGINEERING

Algorithm development and structured programming techniques, including numerical and graphical applications related to engineering and scientific problem solving.

3 Credits

Prerequisites

• Ch E 251 Requires: One Way-Co-Requisite Math 261

One-way corequisites

• Math 261: Unified Calculus & Analytic Geometry I

Instruction Type(s)

• Lecture: Lecture for Ch E 251

Subject Areas

• Chemical Engineering

Related Areas

• Chemical and Biomolecular Engineering
