

## C E 412: Design of Concrete Structures

### CIVIL ENGINEERING

Strength analysis and design of reinforced concrete structural elements using ACI requirements. Rectangular and T sections in bending. Shear reinforcement in beams. Short columns. Footings and retaining walls. Introduction to analysis and design of steel structural elements.

3 Credits

### Prerequisites

- [C E 311: Structural Analysis](#)
- Pre-Requisite: 24 Earned Hours

### Cross-listed Courses

- [M E 422: Structural Design I](#)

### Instruction Type(s)

- Lecture: Lecture for C E 412

### Subject Areas

- [Civil Engineering, General](#)
- [Structural Engineering](#)

### Related Areas

- [Civil Engineering, Other](#)
- [Geotechnical and Geoenvironmental Engineering](#)
- [Transportation and Highway Engineering](#)
- [Water Resources Engineering](#)
