

M E 405: Modern Energy Conversion **MECHANICAL ENGINEERING**

Consideration of high power density conversion such as nuclear Power, wind power, ocean power, solar power, biomass conversion, magneto hydrodynamics, fuel cells and electro-mechanical conversion.

3 Credits

Prerequisites

- [Engr 321: Thermodynamics](#)

Instruction Type(s)

- Lecture: Lecture for M E 405

Subject Areas

- [Electromechanical Technology/Electromechanical Engineering Technology](#)
- [Mechanical Engineering](#)
