

# Ch E 543: Introduction to Polymer Science <a href="#">CHEMICAL ENGINEERING</a>

This course is designed as an upper-level undergraduate and introductory graduate-level elective to teach the fundamentals in polymer chemistry and physics, structure/property relationships, and characterization. The course is taught at an introductory level aimed at students with a background in chemistry (especially organic chemistry).

3 Credits

## **Prerequisites**

- Chem 221: Elementary Organic Chemistry I
- Instructor approval or graduate standing.

### Instruction Type(s)

• Lecture: Lecture for Ch E 543

### **Subject Areas**

• Chemical Engineering

#### **Related Areas**

• Chemical and Biomolecular Engineering
