

M E 405: Modern Energy Conversion MECHANICAL ENGINEERING

Consideration of high power density conversion such as nuclear Power, wind power, ocean power, solar power, biomass conversion, magneto hydrodynamics, fuel cells and electro-mechanical conversion. 3 Credits

Prerequisites

• Engr 321: Thermodynamics

Instruction Type(s)

• Lecture: Lecture for M E 405

Subject Areas

- Electromechanical Technology/Electromechanical Engineering Technology
- Mechanical Engineering

about the accreditation.
