

## Ch E 524: Microscopy for Engineers

### CHEMICAL ENGINEERING

Comprehensive study of the principles of optical microscopy and imaging techniques commonly used in engineering research, with an emphasis on biological, biomedical, and chemical engineering fields.

3 Credits

#### **Prerequisites**

- Pre-Requisite Phys 212 OR Graduate Standing

#### **Subject Areas**

- [Chemical Engineering](#)

#### **Related Areas**

- [Chemical and Biomolecular Engineering](#)
