

Phcy 507: Integrated Systems: Endocrine System

School of Pharmacy

This block provides patient-centered care of the endocrine system while serving as a collaborative interprofessional team member. It introduces basic concepts of pharmacology and medicinal chemistry particularly as applied to the endocrine system. This course focuses on providing patient-centered care to patients who have an endocrine issue. Learners will develop, integrate, and apply knowledge from the foundational disciplines (i.e., pharmaceutical and clinical sciences) and apply the Pharmacists' Patient Care Process in solving case-based scenarios of patients with endocrine issues.
