

Ch E 523: Molecular and Cellular Biophysics

[Chemical Engineering](#)

This course provides a molecular perspective on thermodynamics, transport phenomena, and reaction kinetics in a biological setting, critical for analyzing, understanding, and modeling life processes that initiate at the molecular level.

3 Credits

Prerequisites

- Pre-Requisite Phys 212 OR Graduate Standing

Subject Areas

- [Chemical Engineering](#)

Related Areas

- [Chemical and Biomolecular Engineering](#)
