

Csci 333: Digital Design and 3-D Printing

[Computer & Information Science](#)

This course introduces the principles and methods for computer-aided design of objects that can be rendered effectively on 3D printers. It surveys the design techniques and the hardware and software technologies in 3D printing workflows. Students create designs and render them on 3D printers.

3 Credits

Prerequisites

- Pre-Requisite: 24 Earned Hours
- Csci 203 or Csci 211 or Csci 251

Cross-listed Courses

- [CIS 333: Digital Design and 3D Printing](#)

Instruction Type(s)

- Lecture: Lecture for Csci 333

Course Fee(s)

Computer Science

- \$50.00

Subject Areas

- [Computer Science](#)
