

## Csci 555: Functional Programming Computer & Information Science

The principles and techniques of programming with functions. Purely functional programming languages; recursion; higher-order functions; reduction models; strictness; type systems; list operations; infinite data structures; program synthesis and transformation.

## **Prerequisites**

• Pre-requisite: CSCI 211 and Math 301 or Graduate Standing

## **Instruction Type(s)**

• Lecture: Lecture for Csci 555

## **Subject Areas**

• Computer Science
