

Csci 259: Programming in C++ Computer & Information Science

Study of programming in the language C++, covering character processing; use of pointers with strings, arrays and functions; data structures; bitwise operators.

3 Credits

Prerequisites

• Csci 111 or Csci 251

Instruction Type(s)

• Lecture: Lecture for Csci 259

• Lecture: Hybrid Lecture for Csci 259

Subject Areas

• Computer Science
