

## Csci 556: Multiparadigm Programming Computer & Information Science

Principles and practices of software design and programming using languages that feature explicit and convenient support for multiple programming paradigms (e.g., imperative, object-oriented, and functional).

## **Prerequisites**

• Either CSCI 211 and CSCI 223 or Graduate Standing.

## **Instruction Type(s)**

• Lecture: Lecture for Csci 556

## **Subject Areas**

• Computer Science
