

Phcy 504: Integrated Systems: Renal School of Pharmacy

This module is designed to provide patient-centered care of disorders involving the renal system. It introduces basic concepts of pharmacology and medicinal chemistry particularly as applied to the renal system. This course focuses on providing patient-centered care to patients who have a renal-based disorder. Learners will develop, integrate, and apply knowledge from the foundational disciplines (i.e., pharmaceutical and clinical sciences) and apply the Pharmacists' Patient Care Process in solving case-based scenarios of patients with disorders of the renal system.
