Csci 356: Data Structures in Python
Computer & Information Science

This course will introduce data structures and their application using the Python programming language. Abstract data types for stack, queue, various lists, trees and graphs will be studied. Built-in data structures such as lists, dictionaries, and tuples will be used extensively.

3 Credits

Prerequisites
- Prerequisite: Csci 256 with a grade of C or Csci 112 with a grade of C
- Pre-Requisite: 24 Earned Hours

Instruction Type(s)
- Lecture: Lecture for Csci 356

Subject Areas
- Computer Science
